*For service information contact your local authorized A-dec dealer.*

*Check with local codes and A.D.A. (Americans with Disabilities Act) requirements for installation of this product.*

---

A-dec warrants its products against defects in material or workmanship for one year from time of delivery (except for handpieces which have a warranty period of six months). A-dec's sole obligation under the warranty is to provide parts for the repair, or at its option, to provide the replacement product (excluding labor). The buyer shall have no other remedy. (All special, incidental, and coincidental damages are excluded.) Written notice of breach of warranty must be given to A-dec within the warranty period. The warranty does not cover damage resulting from improper installation or maintenance, accident or misuse. The warranty does not cover damage resulting from the use of cleaning, disinfecting or sterilization chemicals and processes. The warranty also does not cover light bulbs. Failure to follow instructions provided in A-dec's Operation and Maintenance Instructions (Owner's Guide) may void the warranty.

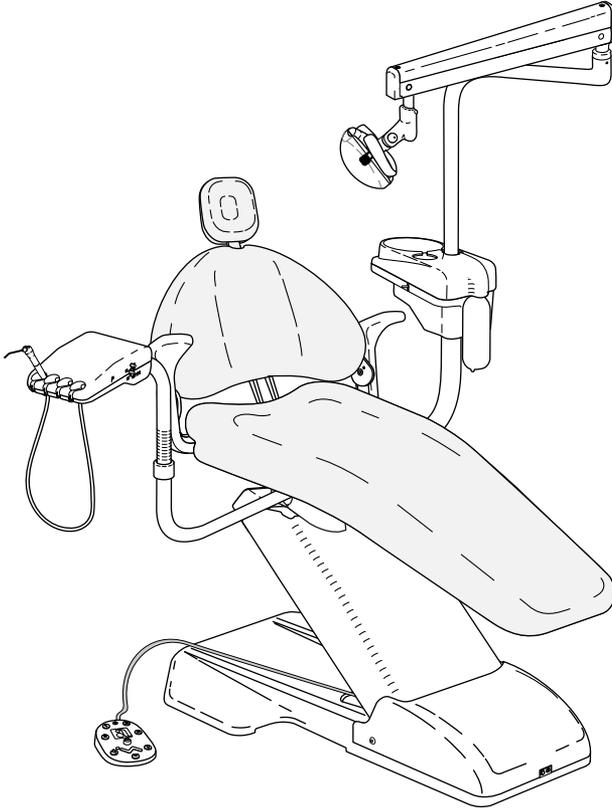

NO OTHER WARRANTIES AS TO  
MERCHANTABILITY OR OTHERWISE ARE MADE

# Performer Chair

## Back Positioning

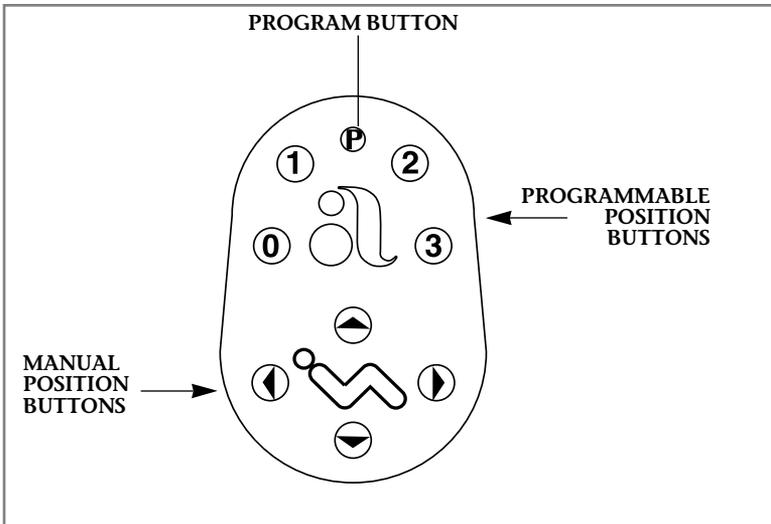

## Seat Positioning

# Performer Chair

## Performer II Chair Only Programming Positions 0, 1, or 2

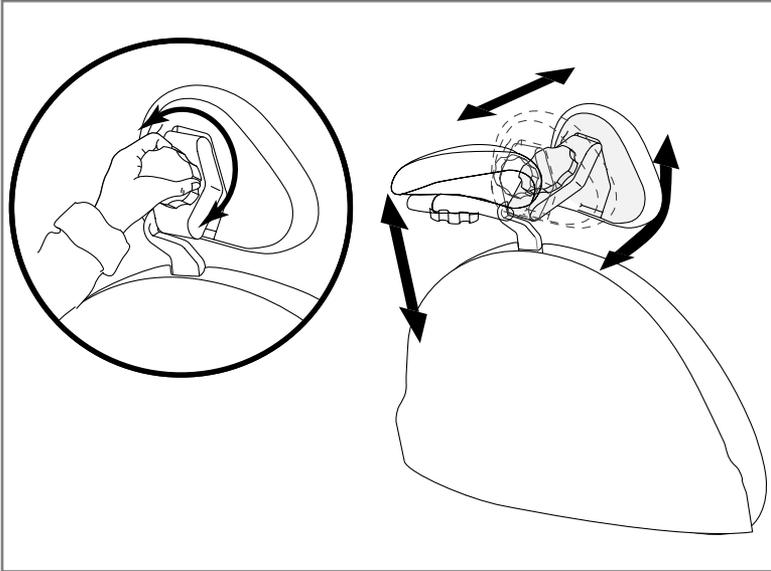

- Move the chair to the desired operating position.
- Press the program button. A tone will sound.
- Press the programmable position button for the desired setting (0, 1, or 2) within 4 seconds.
- A tone will sound 3 times confirming the position has been reprogrammed.

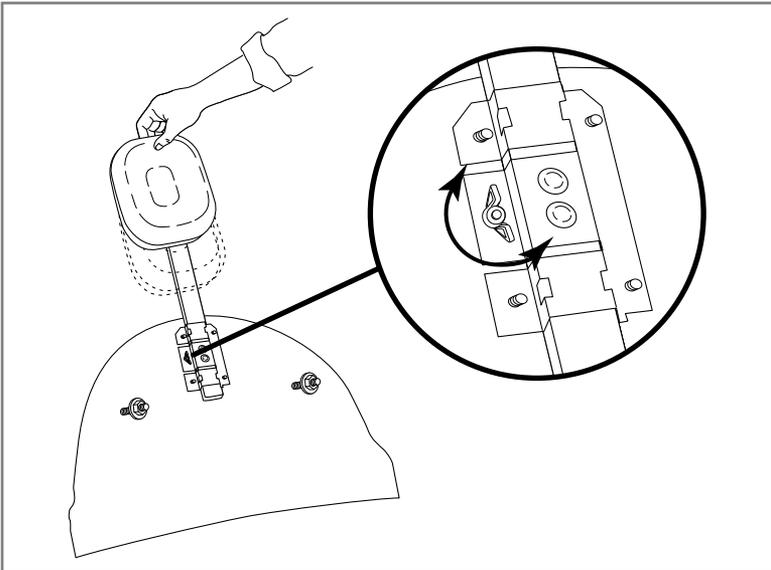

Position 3 is factory set in the Cuspidor/Return mode. Pressing the position 3 button moves the chair back up allowing patient access to the Cuspidor. Pressing the position 3 button a second time returns the patient to the previous operating position.

Position 3 may also be used as a third programmable position or as a last position recall. Contact an authorized A-dec dealer to have position 3 reconfigured to a programmable position or as a last position recall.

## Wet/Dry Toggle

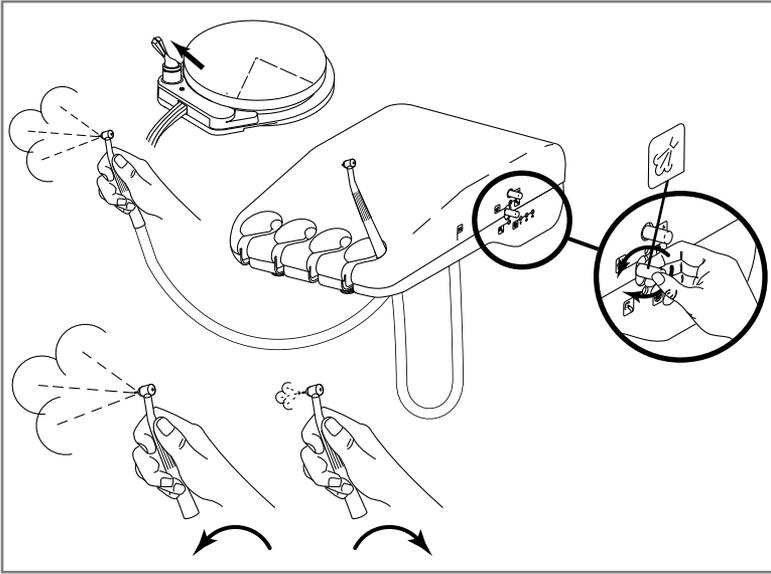

# Handpiece and Foot Control

## Drive Air Adjustment

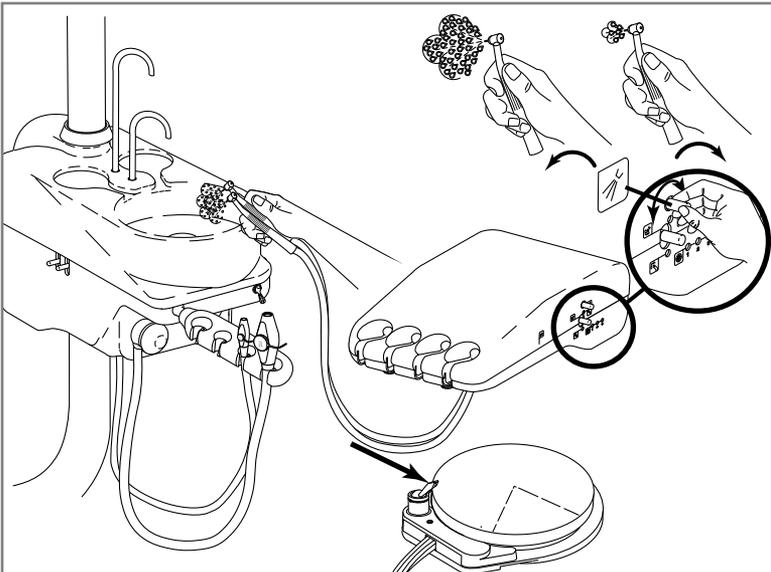

# Handpiece and Foot Control

## Coolant Air Adjustment

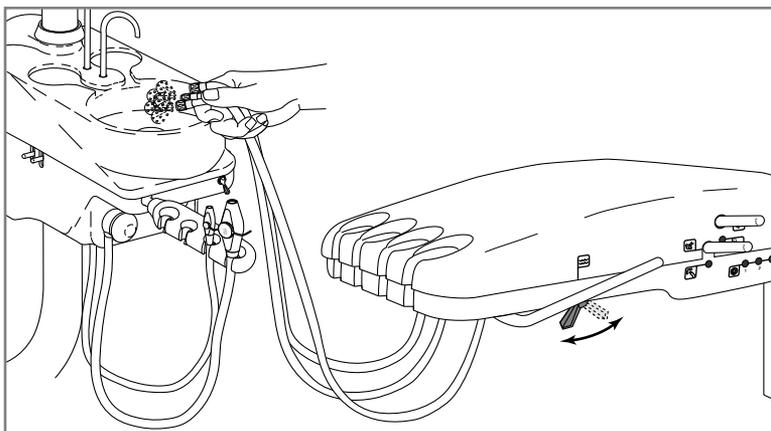

## Coolant Water Adjustment

# Handpiece and Foot Control

## Handpiece Tubing Flush

The handpiece tubing flush system flushes more water through the tubings in less time than is normally possible when operating the foot control only. The handpieces should not be connected when flushing the tubings.

### **How Often Should the Handpiece Tubings be Flushed?**

#### ***After Each Patient:***

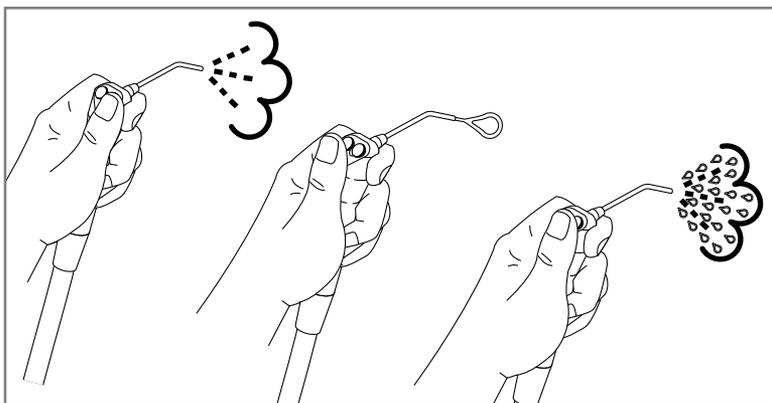

Flush the tubings for about 20–30 seconds.

#### ***At the beginning of Each Day:***

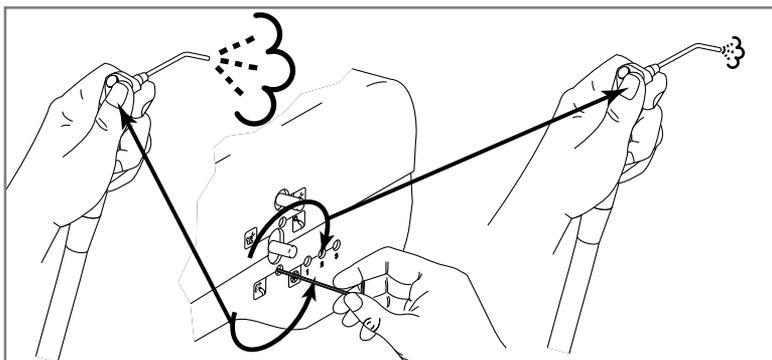

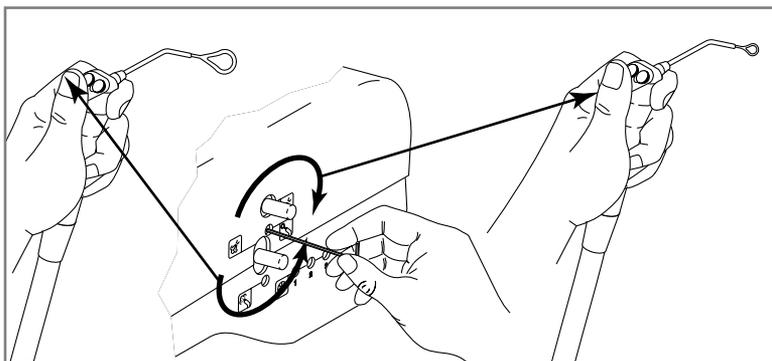

Flush the tubings for 2–3 minutes.

<b>Owner's Guide</b> .....	85.0680.00
Cuspidor Water Flow Adjustment .....	page 16

Minimum air, water, and vacuum service requirements for proper unit operation:

Air: 2.50 cfm (70.80 l/min) at 80 psi (551 kPa).

Water: 1.50 gpm (5.68 l/min) at 40 psi (276 kPa).

Vacuum: 12 cfm (339.84 l/min) at 8 inches (27 kPa) of mercury.

Maximum control head weight is 55 lbs. (30 kg).

Maximum moment at the chair created by the freestanding control head is 63 ft. lbs. (85.42 N·m).

Maximum cuspidor and light weight is 27 lbs. (12.25 kg).

Maximum moment at the chair created by the cuspidor and light is 82 ft. lbs. (111.18 N·m).

Weight of optional scaler: 2 lbs. (.91 kg).

Chair Capacity:

Patient Load: 300 lbs (135 kg) maximum.

Accessory Load: 130 lbs. (59.0 kg) maximum.

**Specifications are subject to change without notice.**

## Safety Considerations for Accessory Equipment

The use of accessory equipment not complying with the equivalent safety requirements of this equipment may lead to a reduced level of safety of the resulting system.

Consideration relating to the use of accessory equipment shall include:

Evidence that Safety Certification of the accessory equipment has been performed in accordance to the appropriate IEC 601 and IEC 601-1 Harmonized National Standards.

## Transporting the Performer Dental Unit

When transporting the Performer Dental Unit the chair base should be fully down, and the chair back should be fully up.

The delivery system should be over the seat upholstery and the light should be centered above the chair.

The delivery system and light should be secured to prevent movement. The entire Dental Unit should be secured to the transporting vehicle.
